## Eyesight is Priceless . . . . Good Light is Cheap

Good light makes a big difference . . . in junior's grades as well as in the eyesight and comfort of all the family. Here's how you can have good light in your home: End dark shadows . . . with indirect light all over the room. Provide enough light . . . for reading and sewing . . . with a different reflector or reflector type bulb . . . the proper shades . . . to eliminate harmful glare.
